

DBSA

DBSA Enterprises provides solutions that deliver wireless enablement of enterprise business processes. The organisation employs proven expertise of over 15 years to select the correct mobility tools and components to meet the specific needs of individual customers. DBSA's methodology spans the entire process from working with customers to identifying areas where mobility can deliver the greatest benefit to evolving the selected platform and solution to meet changing business needs.

SOLUTIONS

DBSA's solutions include a generic messaging framework that supports multiple wireless solutions, including Microsoft Windows Mobile and BlackBerry. Our organisation can also implement proven 'out-of-the-box' enterprise mobility toolsets provided by Research In Motion, Dexterra, Bright Software, Sybase and Flowfinity. DBSA's development experience enables it to deliver enterprise-standard systems across any device or network.

DBSA's mobility expertise spans:

- Consulting, strategy and solutions architecture
- Project and change management
- Integration of current and legacy systems
- Application development
- Multi-channel application delivery
- Testing and deployment
- Hosting and service management
- Coaching and mentoring.

BENEFITS

Partnering with DBSA to wirelessly enable key business processes will:

- Ensure the right mobility solution is delivered
- Deliver a rapid, measurable ROI to your business
- Increase users' productivity, efficiency and job satisfaction
- Communicate innovation and market leadership to your customers
- Provide a robust and extensible platform for your future growth
- Begin an ongoing relationship serving the dynamic needs of your organisation.
