

## MOBILISE IT

Mobilise IT is a highly specialised organisation focused on helping companies improve business productivity and process efficiency by using the latest mobile computing hardware and Microsoft technology. A Microsoft Gold Certified Partner, Mobilise IT provides services, software and infrastructure that help its customers create an efficient and effective mobile workforce.

What sets Mobilise IT apart is telecommunication expertise and its ability to deliver a complete range of mobility solutions and services, from mobile mail using the latest Microsoft technology and hardware, through to integrated sales, service and supply chain solutions, to all industry segments.

### SOLUTIONS

- **Field sales and service solutions.** The company offers a fully customised and integrated solution for in-field sales or service people. This can be integrated with Microsoft Dynamics GP and NAV, SAP Business and Arrow Financials.
- **FormoPublish – eForms.** FormoPublish produces electronic forms using Microsoft Office that work on Microsoft Windows Mobile 5.0 and 6.0 devices. It requires no additional hardware or software and absolutely no coding. The solution integrates with Microsoft Office InfoPath and Microsoft Windows SharePoint Services.
- **Mail To Go.** This enables clients to set up wireless email on the Microsoft Direct Push Mobile Email platform as a hosted service or to configure Microsoft Exchange Server 2003 and 2007 for direct push email.
- **Mobility consulting.** Mobilise IT's consultants cover a broad range of areas, from mobile devices as a standard operating environment to customised workforce solutions.

- **Development expertise.** The company offers customised development of solutions provided by Mobilise IT's team of expert technicians using the Microsoft .NET development framework. Mobilise IT staff are back-office integration specialists.

### BENEFITS

Introducing a mobile solution from Mobilise IT will:

- Empower your sales and field forces to become effective and efficient
- Disseminate information to be accessed anytime, wherever Optus Mobile GSM (or the relevant network) has coverage
- Increase customer satisfaction with speedy and accurate information
- Boost revenue by tracking customer information in real time
- Eliminate manual paperwork, reducing duplication and errors.
