

REFLEX TECHNOLOGY GROUP

Reflex Technology Group (RTG) specialises in consultancy, design, implementation and management to deliver complex custom-built or off-the-shelf mobility solutions. RTG partners with leading vendors including Microsoft, Motorola and Symbol.

SOLUTIONS

RTG delivers the following solutions:

- RTG BlackBerry. Design, implement, customise and manage all aspects of BlackBerry technology.
- RTG consultancy. RTG consultants have a sound knowledge of business systems and procedures. They consult across all aspects of IT and can integrate mobility solutions into back-end systems.
- RTG mobile billing. Design customised billing solutions for mobile applications, integrating customer relationship management, financial and database applications.
- RTG field force automation. Vehicle and boating GPS location monitoring and tracking, security integration and billing.
- RTG logistics and sales force automation. Custom applications for logistics and sales force inventory and billing, delivery-run planning, client signature authentication and storage, mobile receipt printers and remote scheduling.
- RTG wireless applications and services. Nokia synchronisation, Microsoft Direct Push from Exchange Server and security with the ability to restrict access to mobile devices.

BENEFITS

Choosing a mobility solution from RTG will:

- Open new communication paths to your staff or customers
- Deliver expertise in mobility and secure integration with core back-end systems
- Create modifiable billing solutions for control and visibility of mobility expenditure.
